

A3: User Interface Prototype

1. Interface and common features

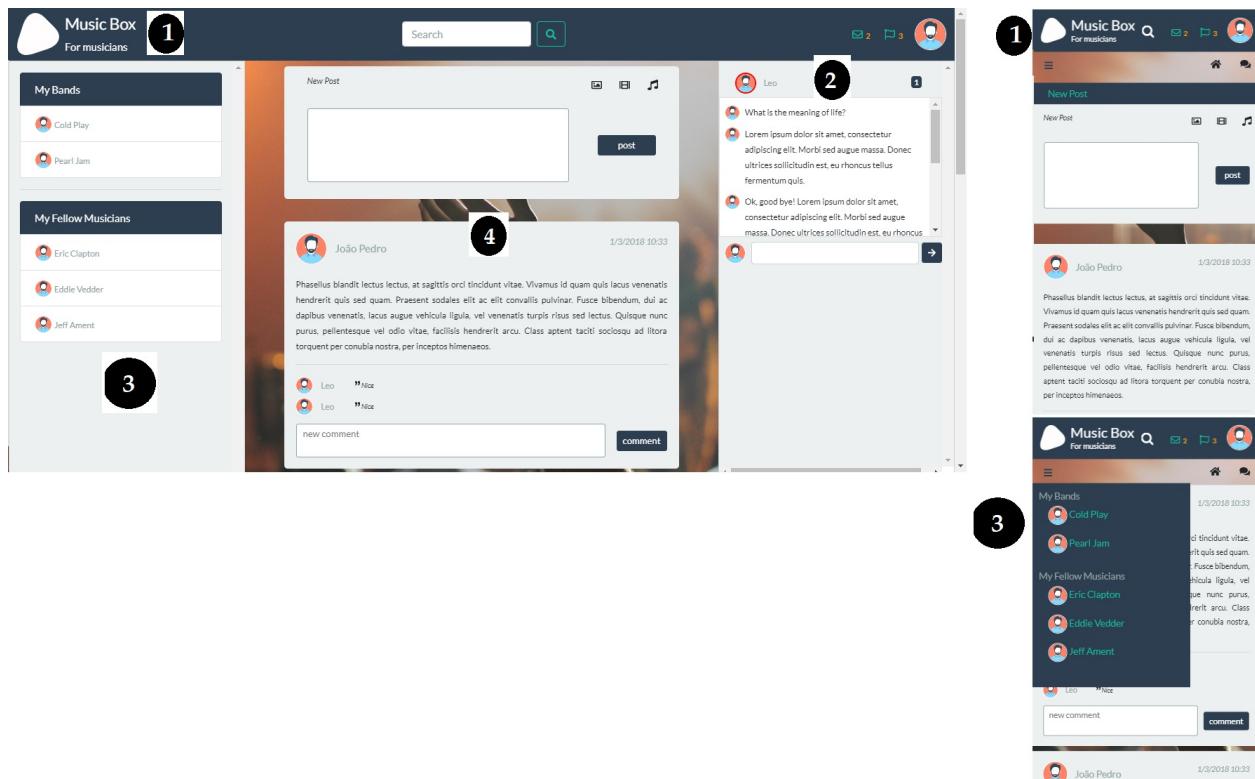

Figure 1 - Main interface

The image above shows the main interface of the website, for an authenticated user, which is the feed page, from where the user can access everything he has permission to.

The tag "1" is located on the header of the website, a navbar with the logo, a search bar, one dropdown for the messages and another one for the notifications, and finally, a picture of the user, to access his profile or logout.

The tag "2" points to the website chat, where users can trade messages with other users.

The tag "3" is on a sidebar, where users have links to their bands and fellow musicians.

The tag "4" is right on the feed section, where users can see posts from the users and bands they follow.

We developed everything so that the website has an appealing interface either on a big screen (computer), a medium screen (tablet) or on a small one (phone).

2. Sitemap

The next image shows the sitemap of the website, representing the hierarchy of the pages and the relations between them, giving the team a better knowledge to build the website.

UI05: Feed

Figure 11 Feed

UI06: Profile

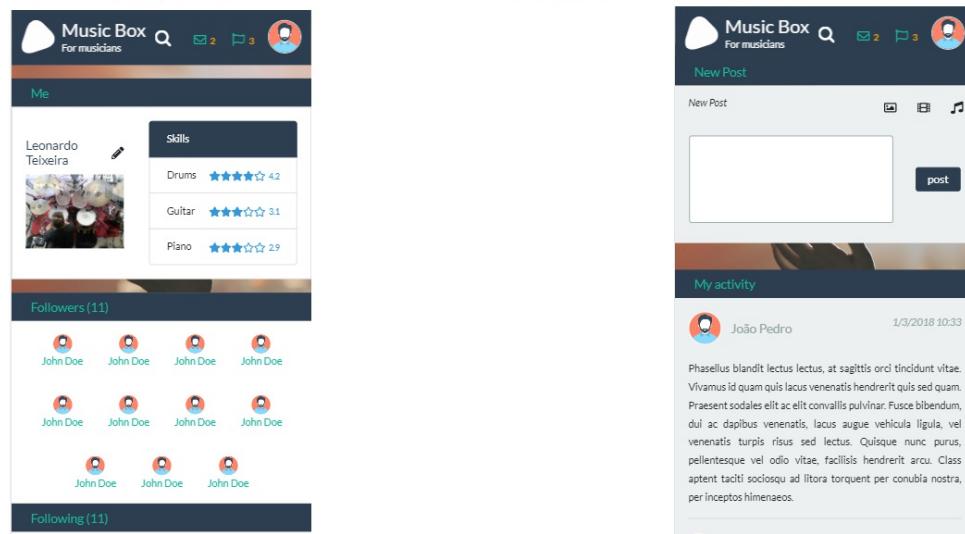

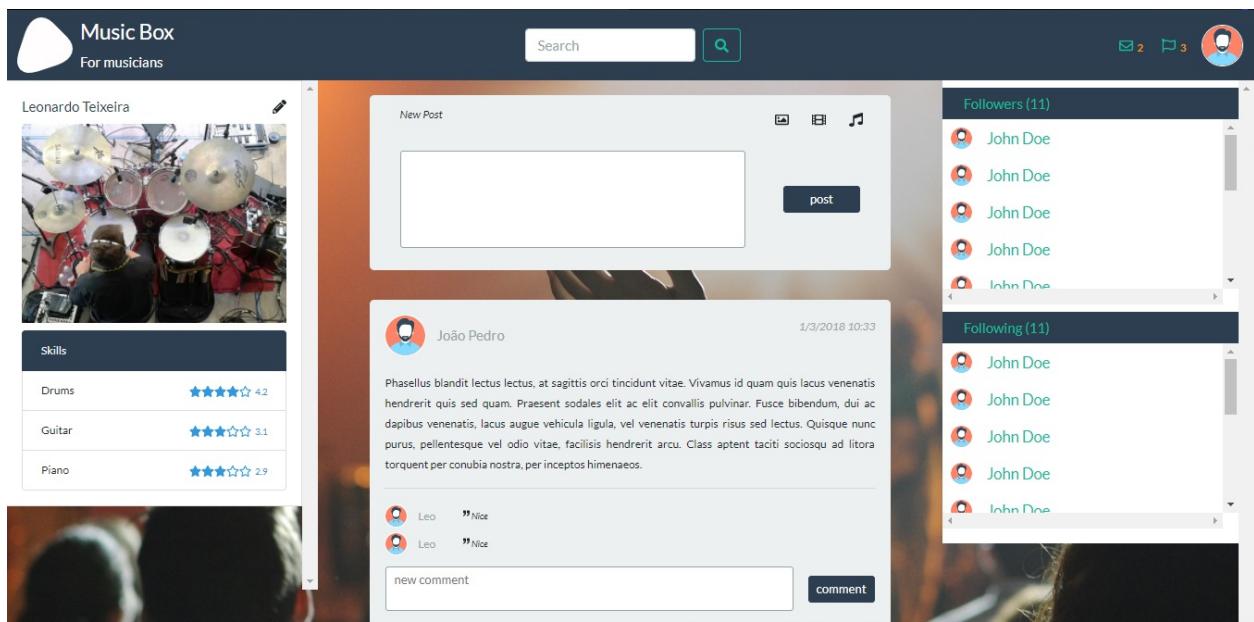

Figure 12 Profile

UI07: Admin

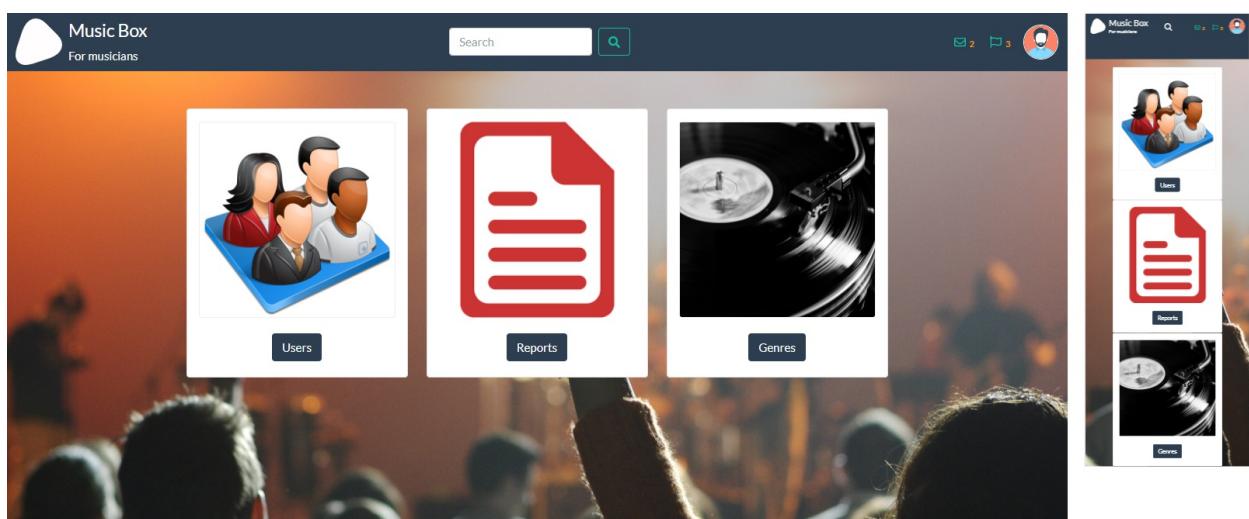

Figure 13 Admin

UI08: Admin Users Page

The screenshot shows the 'Users' section of the Admin interface. It lists three users: John Doe, Jane Doe, and Another Doe, each with their email address and an 'Admin Privileges' toggle switch set to off.

Username	Email	Admin Privileges
John Doe	johndoe@doe.com	Off
Jane Doe	janedoe@doe.com	Off
Another Doe	anotherdoe@doe.com	Off

Figure 14 Admin Users

UI09: Admin Reports Page

The screenshot shows the 'Reports' section of the Admin interface. It displays two tables of data:

- Reported Content:** Shows reports from users. John Doe has 0 warnings, Jane Doe has 1 warning, and Another Doe has 3 warnings. Each row includes a link to the reported content and a 'Report' button.
- Band Activity:** Shows reports from bands. The Does have 0 warnings, The Joes have 2 warnings, and The Toes have 1 warning. Each row includes a link to the reported content and a 'Report' button.

Figure 15 Admin Reports

UI10: Admin Genres Page

The screenshot shows the 'Genres' section of the Admin interface. It lists several genres: Rock, Jazz, Pop, Metal, Hip hop, Disco, and Blues. There is also a 'Add new genre' input field and a 'Add Genre' button.

Genres
Rock
Jazz
Pop
Metal
Hip hop
Disco
Blues
